

## **Change in Fleetwood Window Requirement** **Board Action, March 20, 2019**

Over time the cost and up-keep needs of the, currently required, front white window lattice inserts (also referred to as grids, mullions, etc.) have kept increasing. This burden to the owners has resulted in a random showing of these lattice decorations around the campus. In addition up-keep has been costly and frustrating for many owners.

In an effort to update the Fleetwood Rules/Regs the board has decided (in conjunction with a past survey) that removal of the lattices is the better path to take. **Therefore from now on all window lattices need to be removed** at the earliest convenience to the owner(s).

You may remove the lattice inserts yourself or request that Fleetwood do it for you. If you wish for Fleetwood to do so, please make such a request via the normal online Building Request Form on the web site. Otherwise if you wish to do the removal yourself read on.

If your lattice inserts fall apart during removal, just further break them down and dispose of them in your garbage. If the lattice inserts remain intact, take them to the maintenance area at the clubhouse and Fleetwood will dispose of them as a batch. There originally were metal clips that held the inserts in place. If yours still exist and you have no need for them please take them to the maintenance area at the clubhouse for re-cycling. It is the intent to attempt to sell these lattice inserts locally on Craigslist, if there are any takers. If there are no takers then the collection of lattice inserts will be taken to the dump.

Thank you for your cooperation.
