

Sound Proofing Policy

When any hard surface is placed as flooring in the upstairs units of any Fleetwood buildings, an adequate sound proofing material must be installed before the finished surface is put in place. Hard surfaces include, but are not limited to the following, tile, wood, laminates, poured hard surfaces, slate and other natural quarried products, plus synthetic hard surface flooring.

Board approval is required for any new, replacement, or additional hard surface placed in upstairs units. The request should include the type surface, the sound proofing material to be used, and the name of the contractor doing the work. Recommendations for sound proofing materials may be obtained by contacting the VP - Building Maintenance.
